5 Strategies to Boost Engagement

■ 1. Peak-Time Posting + Engagement Sprint	Post at 9 AM / 12 PM / 7 PM. Respond to every comment in the first 60 mins. The algorithm rewards early engagement with wider feed distribution.	■ +20–35% reach in first hour
■ 2. Hashtag Tiering (Broad + Niche + Branded)	3–4 broad tags (#tech #startup) + 5–6 niche tags (#dataanalytics #aitools) + 2 branded tags (#AlfidoTech). 33.4% of likes already come from non-followers stronger hashtag strategy amplifies this pipeline.	■ +15–25% non-follower reach per post
■ 3. Dormant Follower Re-Engagement Campaign	44.9% of followers are inactive. Run 3 consecutive interactive Stories (poll + quiz + Q&A) in one week. Respond to re-engaged users' own posts. Launch a 'followers-only' exclusive content drop to incentivise return.	■ +10–20% dormant follower reactivation in 30 days
■ 4. Emoji-First Comment Response Culture	50% of comments already use emojis. Reply within 2 hours using emoji-rich responses. End every caption with an emoji CTA: '■ Drop your thoughts below!' Early comment responses boost algorithmic ranking significantly.	■ +30–50% increase in comment volume

■ 5. 60/30/10 Content Mix + Authenticity First	60% Photos · 30% Reels/Videos · 10% Carousels. Unfiltered posts outperform filtered keep visuals natural and brand-authentic. Prioritise Reels: Instagram gives them 2–3x more organic reach than feed posts.	■ +25–40% overall account reach in 60 days
